The Rydings Architectural Control Committee Approved Satellite Dish Locations

Item 11 of our protective covenants states:

“No satellite dish of any kind shall be permitted on any lot except as authorized in writing by the Architectural Control Committee (ACC).”

The Rydings ACC has adopted the following policy regarding approving satellite dish locations:

No C-Band (large ~5ft diameter) dishes are permitted in The Rydings Subdivision.

Satellite dishes that are supplied by the Satellite companies (Dish Network and DirecTV) are acceptable. However, please be aware that satellite dishes must be installed in the backyard of your home so they are not easily visible from the street. Please inform your installer of this requirement. Some installers have a tendency to place the dish at the most convenient location for them. Dishes may be installed on your home or on a pole in your backyard. No more than two per home.

If your home has an existing dish that you would like to have moved to an appropriate area, you may call your satellite company and request it to be moved. Both Dish Network and DirecTV will move your dish one time for free.

Any deviation from the listed elements must be approved by the Architectural Control Committee. The ACC may be reached by mail using the address above or online at www.therydings.com Contact Us link.

NO WINDOW A/C's ALLOWED!!
